

# Tube, Pipe and Profile

## Bending and Metalworking Machinery

# Application of the Month

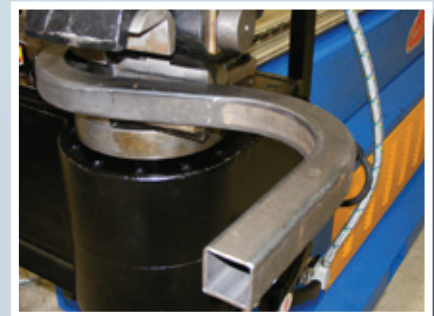

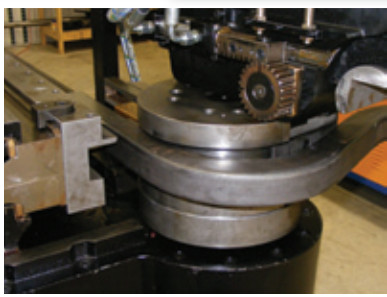

## Chassis Components for Agricultural Equipment

- Material: 2" x 2" x .120" wall mild steel tube
- Radius: 5.25" CLR
- Interlocking centerformer and pressure die system – controls profile expansion and simplify material extraction

- "KST" clamping minimizes material slippage. . eases material positioning
- Square cut work holding jaws for tailstock clamping
- Opposing 120 degree bends with 6" distance between bends
